

Digital advertising at Mediahuis Connect

As of October 2017, clients who want to advertise on both our **mobile and desktop sites** will be asked to deliver **2 formats**, matching the requirements for each device.

Desktop formats will not be resized to mobile formats. If we receive only a desktop format, the campaign will only run on desktop. The same applies for the delivery of a mobile only format.

Procedure

Why?

- More than half of the visitors of the Mediahuis newspaper websites use a smartphone to access our content.
- 41% of all page views on our news sites comes from a smartphone
- A device specific format guarantees an optimal visualization of the ad. This increases the user experience and the overall appreciation of your campaign.
